CALL FOR PROJECTS

FIRST VENTURES

LAUNCH YOUR OWN SPIN-OFF!

Ready to take risks and found your own company? Then apply to First Ventures.

We aim at encouraging entrepreneurial bachelor's and master's students eager to launch their own spin-off, turning new ideas into innovative products and services. Up to a maximum of CHF 150,000 are available per business project coming from universities of applied sciences. You can choose between three funding options.

You get not only financial support but also an individually tailored training programme. You will learn how to successfully put your business idea into practice and gain access to a broad startup network.

First Ventures start-ups typically go through three consecutive phases:

PROOF: UP TO 3 MONTHS	Test feasibility: Needs assessment, feasibility analysis, early prototypes	MAX. CHF 25,000
VALIDATE: UP TO 6 MONTHS	Validate business case: Pilot projects, validation of business and impact potential	MAX. CHF 50,000
EXECUTE: UP TO 9 MONTHS	Launch to market: Roll-out, market entry, scaling	MAX. CHF 75,000

If a start-up project has already achieved the objectives of a funding level, it is possible to enter the VALIDATE or EXECUTE phase directly. In this case, CHF 50,000 or CHF 150,000 can be applied for.

Submission deadlines: 1 February, 1 May, 1 September, 1 December

Please check our support criteria before applying.
